Santiago Carter's Romance,

make love to her daughter.

Juanita and resolved to have her anyway. She was willing and I was anxious. Why wait? I paid a final visit to my

me in the court yard with courteous an-

noyance. I asked for Juanita and the dear old lady said: "She is fifty leagues

away, thank God, and will never marry

a heretic," Just then a small voice in tones of laughter and tears came muf-

fled through the door, saying: "It is a lie, Jimmie: I am shut up here." I thought it my duty to open that door,

man as my little girl came in beautiful confusion to my arms and I had barely time to say: "Be firm, my darling; we

fold me that he rather sympathized with

me. The next day I went to the political chief and asked for justice. One of the reform laws authorizes the chief of a

district to take a girl away from her parents when she is willing, and deposit her in some respectable family, ordering

immediate marriage. When she is not of legal age, but the chief thinks her old enough to marry, he makes her of age by dictum. This chief came out beauti-

fully. He visited my future mother-in-law, investigated, made Juanita two years

friend, and gave me notice to begin, all in forty-five minutes. Getting married in Mexico is a complicated operation. I

help on the civil part I would carry her about the world as my sister until we

could find some civilized priest to give

us Catholic marriage. When the reformers took civil marriage from the priests and gave it to the register, they set up

church used, minus the ceremonies and

the prayers. My first move was on this register. In Mexico, when you need a public servant, it is well to find out something about him first. I learned that my man was a clean crabbed old fellow.

up a temporary trousseau.

killed, I'd lose; it I got killed, ditto. But e could not see it, so I asked the chief o cool them in jail, and he did so. The

the governor. He was a fine oid fellow, the best thing in Mexico, a governor without a ring. He asked four questions,

looked right through me and signed the paper. We were now fairly getting mar-

ried. The trousseau was ready, My bodyguard dogged my heels. The priest crossed the street when he saw me com-ing. My lawyer scowled at his aniago-

nist when I was looking. The man about

mother-in-law and she received

Free Rural Daily Mail Delivery.

The urban trolley car and free rural mail delivery are things of the near future in country life which will, in adding to the attractiveness of country life, relieve the congestion of cities. Such improvements never go backwards, and while the trolley car will be some time in reaching far into the country except as they will soon be connecting closely adjoining towns and villages with the nearest city, the rural was first broached many were the jokes gotten off at the expense of the farmer, whom the city scribbler assumed had little use for mail beyond the receipt of his weekbe in close touch with city life and with all the world and be living in the free open air and sunshine of his country included. home. Four free delivery malling divisions are now estab. lished, which divisions cover the four principal sections of the country, and the rural free delivery of mail will from now on develop rapidly.

Woman as a Superior Entity.

Few men can be found of late possessing the temerity to stand up, anywhere within the earshot of a seeker after equal suffrage, and declare that man is either the mental or spiritual equal of woman. She is proportionately greater Leases and Annie Diggses, as successors of the Susan Anthonys and Lucy Stones, there has been left only one boast where. Even in the hired-girl bossed kitchen he is of less and less consideration. All has been ruthlessly swept away, and even the few left chances of matrimony are disappearneath a once optimistic horizon of a physical superiority. The announcement is made that women's athletic clubs are being established throughout the country, genuine gymnasiums for the development of female muscle, in which bowling, billiards, fencing, boxing, pole turning and other like athletic sports will be taught and practised. The superunreflecting observer may see nothing menacing in all this. But so this same class saw nothing to fear in the admission of girls into colleges and the giving of women masium that traditional straw which proved too much for the hump of the camel. It constitutes a distinct declinefor man, and for matrimony, and hence of chances for mothers and babies. Following the invention of incubators and bottles, man, in his relegated estate, may hit upon something that will save him, but the problem is complicated, as the consequences seem imminent and inexorable.

One Explanation of the Puzzle,

The Lawrence Journal mistakes the spirit of the Eagle's reply to the Leavenworth Times, which paper wanted to be dished up by the Eagle, and which in toto was to the effect that the connection between the state treasury and five Topeka banks is so close as to render it impossible to tell tother from which. The state board certifies that state mon. ies are carried by the Topeka banks, while the sworn statements of the officers of said banks fail to show any such rariles. Our inference, therefore, was that the said monles must be carried as "individual" deposits, which, if true, then we wanted to know the name of the individual, and what, if any, interest or current balances were paid and to being carried by said banks at the times when state warrants were being stamped "Not paid for the want of funds," Of the details later secured and the reference to which fact seems to have proved a puzzle, or rather the omission of a publication, we can only reassure the editor of the Journal that we laid down our hand because of the impudent bluff ing such straights, flushes and fours of a kind as would, in tending to disturb the harmony around the board, lead to a gains. If the esteemed Journal and Times find themselves un-Joe Hudson, together with the persons constituting his crowd, with all the papers bearing on the new deal. Any suggestions that the Eagle lacks the requisite nerve to crowd the obvious, or to lay have its mare's nest, and the like, will be wasted wind, for no one is so painfully aware of the fact that the Eagle's great lack is its extra supply of nerve as its editor, whose courage only too frequently denotes the excellence of his superior judgment,

Who, Then, will be Mistress of the Seas?

The supremacy of Great Britain has been her merchant ness will be in sight. Up to the present time her shipping capacity has exceeded that of all the other nations. She is still determined to hold the lead, but every year it is more and more difficult to hold it. Other flags are rapidly gaining on the British, and the rivalry is already very keen, There are now being built twenty-five big steamers for service between this country and Europe, and only nine of

An American line is building six vessels. A continental company advertises 131 trips between New York and Europseem unable to keep the pace. The Germans, too, are rapfully coming to the front as shipbuilders.

When other nations got the merchant ships England may have the warships. But the period of her decadence

The Maine, Sampson and Schley.

A recognized foreign authority has settled to his own satisfaction, at least, and to the satisfaction of numerous people on this side of the Atlantic as well, the responsibility for the sinking of the Malne, as also to whom is entitled the honor of the naval battle off Santiago. H. W. Wilson author of "The Downfall of Spain," says that it is the general opinion of foreign naval authorities that the Maine explosion was caused by spontaneous combustion, but ther a study of the evidence establishes for him the probability that the ship was blown up by a mine. One strong negative reason that brings this conviction to Mr. Wilson's mind is that all other suggested causes are wholly improbableas that, for instance, the Maine was destroyed because of a fire in her coal bunkers, when it was shown that there could be no fire there without an alarm being given, and that if there had been such fire it could not have communicated to the ammunition. We hope that, for some of our readers, at least, it does not altogether destroy re-Hance on Mr. Wilson as a naval authority to learn that he takes the Sampson side of the controversy made by Schley's farmers of the United States will be receiving their friends, and that he characterizes as ungenerous and ignorant the attempts to rob the former of credit for the success of the Santiago sea fight. That Schley blundered, Mr. Wilson shows from the official reports, those of Schley himself

"Dr. Bryan" Helps the Rebels,

Fresh evidence of the fact that Bryan's utterances have given comfort to the Filipino insurgents is furnished in a letter from Captain Frank S. Long of the Thirty-ninth regiment of volunteers, who is now serving in the Philippines, to the Burlington, Ia., Hawkeye.

In the letter Captain Long says that copies of New York's newspapers containing Bryan's carefully prepared review of the president's message to congress were scattered broadcast in the Philippines. When the town of Binang was taken a native newspaper was confiscated. In it was an impassioned appeal to the insurgents to stand by their leaders, as "Dr. Bryan and the democratic party would soon be in power," and then would follow the withdrawal of the American troops." In several places "Dr. Bryan" was referred to as a good friend of the Filipinos, his name being used with the sole purpose of bolstering up the Filipino

Captain Long attributes Bryan's attitude to ignorance of real conditions. He says if the democratic candidate understood the situation he would not favor independence be nothing but a farce. Most of the land, he says, is owned renegades from the Catholic church. These men exercise absolute control over the natives at present, and the rebels are compelled to fight against their will. Popular suffrage, under such conditions, he asserts, would be worse than a mockery. The Filipinos, he says, never enjoyed such free. dom from oppression as they enjoy now, and they will gladly welcome the establishment of American rule throughout had promised Juanita that if she would the islands on that account.

A Fact That Farmers Should Remember.

The Leavenworth Times, in discussing the figures of the

Department of Agriculture, verifies the following facts: During President Harrison's administration the value of farm animals rose from 2,329 million dollars in January, 1891, to 2,483 million dollars in January, 1893-an increase of 154 million dollars. During Grover Cleveland's presidency the value of live stock decreased from 2,483 million dollars to 1,655 million dollars in January, 1897-a decrease of 828 mil. lion dollars. Under Harrison, republican, the tendency was lion dollars. Under Harrison, republican, the tendency was not supported by the stock has all designs are aroused. When their feelings are aroused. My risen from 1,655 million dollars to 2,212 millions—an in-crease of 557 millions. These are facts and figures, guar-our millimonial fight and made docu-our millimonial fight and made docuanteed by the Department of Agriculture, which the American farmers will remember at the polls next November.
